

Some initiatives our tutors and 16-18 learners have implemented in order to be more sustainable:

- Car pooling - some of the learners share taxis
- A lot of our learners walk to the centre instead of getting buses or taxis
- The learners take away the produce they make, to share with their families, which cuts down on food wastage
- We only buy what is needed for each lesson and don't over order things so we don't have large stores of dry goods and fridges full of produce
- Most of the learners do all their coursework on computers, cutting down the amount of paper usage
- We recycle all dry goods and food waste if any
- We discuss this in PHSE regarding buying cheap clothing from places like Shein and Primark as these places use slave labour to make their clothing and normally never last long due to low quality
